

GREAT

ER

Yes, *great* can mean big—and, with 44 treatment rooms, our ER *is* big enough to support the emergency medical needs of our community. Size alone, though, doesn't make for a great ER.

Great can also mean superior—and our ER team constantly works to provide superior medical treatments to our patients. But, at the end of our day, what really matters is how great a job *you* think we did.

That's why we also focus on providing great service where it counts. Streamlined admissions. Seeing a doctor sooner. Faster testing and diagnosis. And quality care delivered by knowledgeable and compassionate people.

Great ER care is not common, it is rare. But when it comes to your health and well-being, our ER team always strives to provide great care and great service.

That's what we mean by great ER.
